

P9 TRANSCRIPT – SPRING BOOT

00:17

I'm going to search spring boot **goes to google and types "how to download spring boot". She clicks on the first link (official website)**

00:22

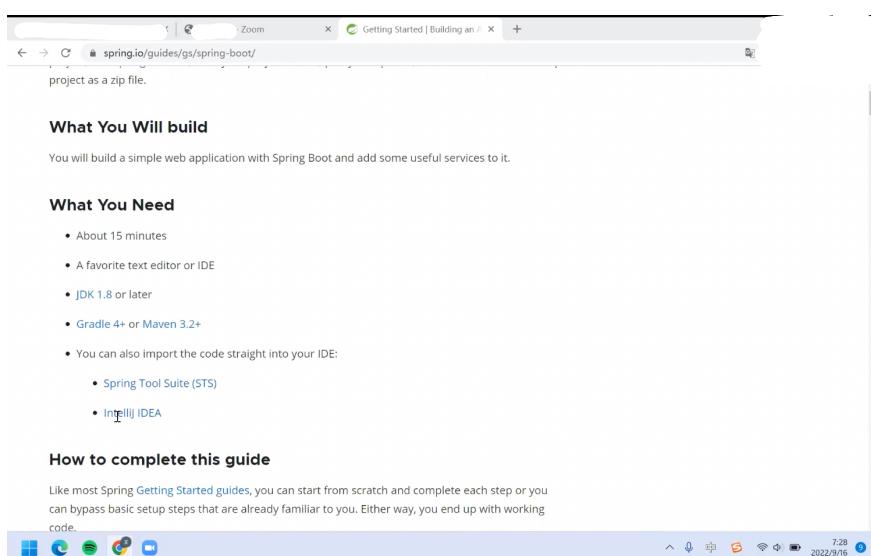

Observer: Are you familiar with Spring Boot?

00:26

no I mean actually not

01:06

I really need a link... **she ironically says she needs a link because the website gives her a list of things she needs to download spring boot, but she just wants a link**

01:17

Okay...it also needs GitHub.

01:40

Observer: Do you have Github?

01:41

Yeah I got it, but I think I'm not doing good with it.

She keeps scrolling the page down, then she finds a way to skip the basic steps, but she still thinks that it's complicated. She follows those steps

You can also import the code straight into your IDE:

- Spring Tool Suite (STS)
- IntelliJ IDEA

How to complete this guide

Like most Spring [Getting Started guides](#), you can start from scratch and complete each step or you can bypass basic setup steps that are already familiar to you. Either way, you end up with working code.

To [start from scratch](#), move on to [Starting with Spring Initializr](#).

To [skip the basics](#), do the following:

- Download and unzip the source repository for this guide, or clone it using [Git](#):
git clone https://github.com/spring-guides/gs-spring-boot.git
- cd into gs-spring-boot/initial
- Jump ahead to [Create a Simple Web Application](#).

When you finish, you can check your results against the code in `gs-spring-boot/complete`.

Learn What You Can Do with Spring Boot

02:26

Observer: when you download tools do you usually like go straight to Google or do you watch YouTube videos?

02:42

I prefer to look at the documentation, if I don't understand then I watch the video

04:44

okay, I think I'll go to youtube... I really didn't expect it... **she goes to youtube and types "spring boot download" and clicks on the first video**

YouTube AU

spring boot download

Spring Tools 4 for Eclipse

Code Java

Spring Tools 4 for Eclipse

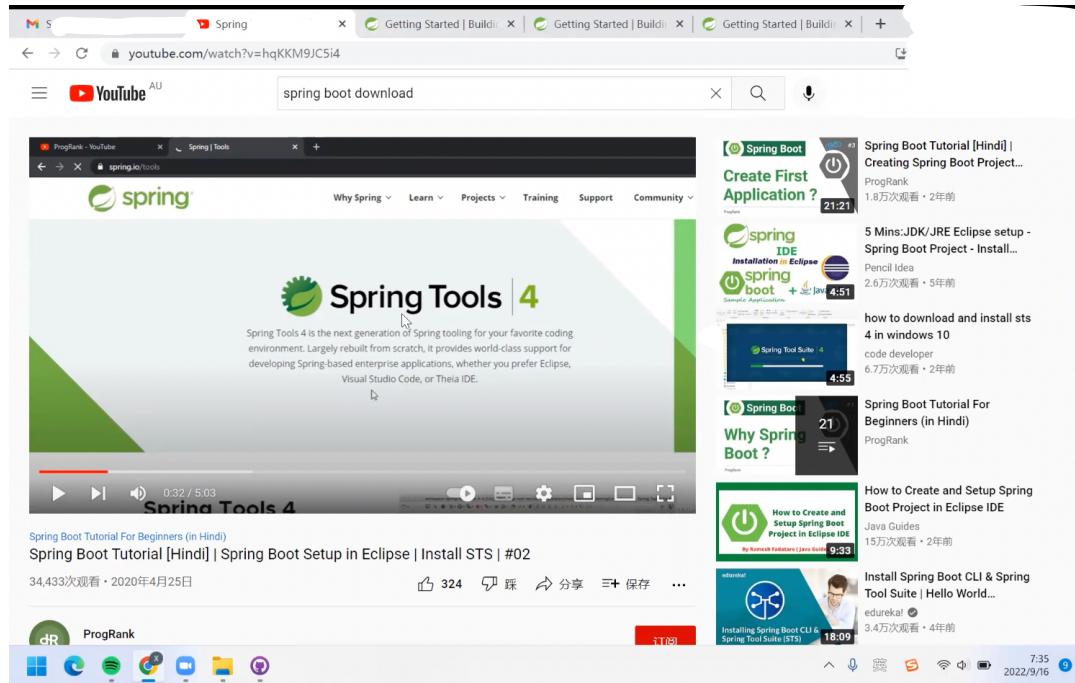

Spring Tools 4 for Visual Studio Code

Spring Boot Full Course - Learn Spring Boot In 4 Hours | Spring...

Spring Boot CRUD Tutorial with Spring MVC, Spring Data JPA,...

07:09

Wait... what is it? "Spring tool"(?) **she sees that the name of the video is spring tool and gets confused because now she doesn't know if Spring tool is the same thing as Spring boot. For that reason she goes back and tries to find another video with "spring boot" in the title.**

08:25

This is confusing... **she is still confused because the title says Spring Boot, but the tutorial shows something about Spring tool. She goes back to the first website she visited (official website) to look if there's anything with "Spring Tool". Interesting fact: the website from the tutorial is the official website as well, and they're both seeing different things when accessing it. | She goes back to the search bar and types "spring boot download vscode"**

10:33

Am I allowed to just download the plug in?

Observer: Yes, sure!

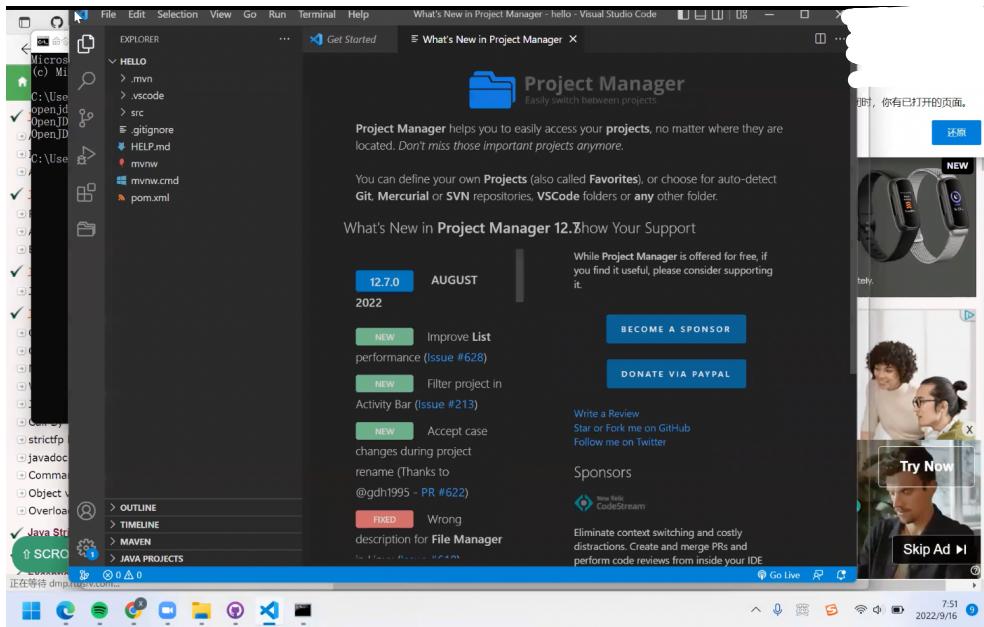

11:05

she opens vscode and downloads the plugin Okay. I found that one...**she keeps following the youtube tutorial with vscode**

16:58

23:45

I'm still trying to find the Java version and now I got one here, but I think I still get an error here but I'm not sure....

24:23

As long as that error message didn't pop up, I will assume it still got the right version *she follows the tutorial on youtube but she's not getting the same things as the guy on the video (she hasn't successfully installed the application)*

28:25

Observer: We're gonna need to stop because I have another student at 10. I'm gonna ask you those questions.

29:20

Observer: Did you have any challenges during the installation process?

29:26

Yeah, I found the document is so complex, so I needed to learn how to install it on YouTube. And YouTube also called me confusing, because I think I supposed to install the Spring Boot, but every video tried to teach me how to use the other tool. → *SPRING TOOL*

Observer: What support/information could have made the installation process easier in your opinion?

30:16

I need to know the relation about spring boot or spring tool first. Is it compulsory to install spring tool for the Spring Boot...? Yeah, and I think I need to know some pull request, like, you need to install or settle down a Java so the problem not like this one pop up
